**Bayer**
**Dear Hiring Manager,**

I am writing to express my strong interest in the Data Engineer intern position at Bayer as advertised on you company website. With a background in computer science, a passion for data science and cloud computing, and a proven track record of adaptability and innovation, I am excited about the prospect of contributing to Bayer's dynamic environment. I am confident that my academic background and hands-on experiences make me a strong candidate for this internship opportunity.

During a recent internship at Mashreq Bank in the United Arab Emirates, I had the privilege of working on a Natural Language Processing (NLP) driven chatbot project. This chatbot was designed to enhance the user experience as part of the Mashreq portal services. Furthermore, my involvement in extracurricular activities underscores my commitment to personal growth and leadership. While in high school, I served on the Model United Nations board, organizing major school events and leading committees. In college, I currently hold the position of Vice President for the Machine Learning club, where I am determined to elevate the club to new heights.

In addition to my club involvement, I am currently working as a Teaching Assistant and Supplement Instructor for the Computer Science department at my university. These roles have allowed me to strengthen my communication and leadership skills while assisting fellow students in their academic pursuits. Furthermore, I am engaged as a Research Assistant, collaborating with Dr Keigo Kawaji on ongoing research projects. Beyond academia, I am actively involved in various projects, including ones for a non-profit organization and a possible feature to my college's website. These experiences have cultivated my ability to work effectively in diverse teams and have exposed me to different facets of software development.

Joining Bayer as an intern would provide me with unparalleled access to state-of-the-art technologies and their practical applications in real-world scenarios. I am eager to learn from the senior leaders at the company and contribute my skills and enthusiasm to the team. Thank you for considering my application. I look forward to the possibility of discussing how my skills and experiences align with the goals of the company during an interview.

Kind regards,
Darshan Sasidharan Nair
